Course Title: SW Practice with Children and Youth
Course Number: SW 696
Division Number: 764
Credit Hours: 3
Prerequisites: Foundation level practice method course
Location: Required methods course in the Children and Youth in Families and Societies Concentration

Instructor: Mary C. Ruffolo, Ph.D.
Associate Professor
School of Social Work Room 2726
(734)936-4799
mruffolo@umich.edu

Winter, 2001

Course Description:
The advanced level methods course in the Children and Youth in Families and Societies concentration, builds upon the foundation level practice methods course and prepares students for employment in the many human service delivery systems which address the needs of children, youth, and their families. This cross-cutting skills course encompasses both direct/micro (i.e., assessment, intervention, prevention) and indirect/macro (program design, evaluation, administration, community organization, policy analysis) practice methods used to address problems presented by or to children and youth in a variety of contexts. The development of social work skills applicable to promotion, prevention, remediation and social rehabilitation activities with diverse child and youth populations at all levels of intervention will be emphasized.

Course Content:
Effective social work practice with children and youth requires a holistic and multi-leveled approach, an emphasis on prevention and early intervention, and the involvement of families, other primary caretaking adults, and involved professionals, in the identification, development, delivery, and evaluation of services. In addition to being able to assess and intervene with children and youth, social workers must also develop the skills necessary to assess the resources and the risk factors which may exist in the child’s or youth’s family, neighborhood, community, and in the larger social environment. In this course the emphasis of intervention is as much on the context as on the individual. Intervention strategies focus on ways to bring about change at levels such as the classroom or school, the peer group, and the community or population, as well as at the individual level. Indirect practice skills covered in this course are aimed at promoting interpersonal competence, self-esteem, self-efficacy, achievement, and moral development in children and youth by making the contexts within which they develop more responsive to their developmental needs.
Direct practice methods covered in this course provide students with the skills necessary to provide short-term interventions, evaluate direct practice, develop service delivery systems and work effectively with individuals, families and groups in families, institutions and communities. Skills for engagement, assessment, intervention, prevention, and evaluation relevant to contexts such as families, neighborhood and community, schools, group care facilities, residential care, hospitals, correctional programs and institutions, courts, governmental and nongovernmental agencies will be covered. Intervention strategies may be derived from a variety of approaches and theoretical perspectives, self-help and peer support, group work, family life education, empowerment models, and family preservation. Students will learn to engage and communicate effectively with children and youth, families and community members, and other service providers. Assessment skills taught will emphasize the importance of being able to identify special needs, abuse and neglect, family violence, substance abuse, and circumstances of extreme stress, danger, or deprivation, and accurately assess the level of risk these circumstances present for the children or youths concerned. Once the child’s or youth’s situation has been thoroughly assessed, the student will learn how to design individual programs of intervention that are based on clearly articulated goals and priorities. Throughout the course, cultural competence and sensitivity to differences among families and the impact of worker/client differences in values, experiences, and power will be emphasized. In addition, the student will learn to understand the significance of “multiple identities” (the interaction of factors such as age, ability, personality, environmental conditions, ethnicity, citizenship and immigration status, social class, gender, sexual orientation and religion) in shaping the uniqueness of families and individuals.

Indirect practice methods covered in this course include skills applicable to the areas of community organization and development, administration, policy and planning, and research and evaluation. Presentation of material from these areas recognizes the importance of working with multidisciplinary teams, service delivery agencies, and formal and informal community systems, in order to obtain necessary resources and support services for children and youth. Specific skills addressed include advocacy, needs assessment, working collaboratively with community agency and groups, administrative and supervisory issues impacting service delivery, budgeting and fiscal issues, program design and development, program and practice research and evaluation, and child and youth policy analysis.

**Course Objectives:**

Upon completion of the course, students will be able to:

1. Apply an ecological perspective to social work practice with children and youth.
2. Effectively communicate with and establish collaborative relationships with children and youth, their families, and other significant members of their social environment.
3. Apply collaboration building and consultation skills to strengthen families and organize communities in response to the needs of children and youth.
4. Assess risks to the child’s or youth’s safety, health, security, and well-being, and identify the strengths and resources available in the child’s environment to address these concerns.
5. Plan or plan and demonstrate micro and macro interventions which are based on identifiable goals and priorities in a culturally sensitive and culturally competent manner.
6. Incorporate social work values and ethical principles in planning and implementing interventions for children and youth.
Course Design:
This course instructor will select readings and design assignments for the course. Various classroom teaching strategies may be used, including lecture, multimedia presentations, small and large group discussion, presentations by students and guest lecturers, role plays, and experiential exercises. Students experiences in the field will be utilized as much as possible in assignments and case presentations and discussions.

Relationship to curricular themes:
a. Multicultural and diversity issues will be emphasized throughout this course, not only in relationship to direct intervention with children and youth and their families and communities, but also in regard to the need to develop and maintain effective collaborative relationships with other community resources and service providers. Students will learn to recognize the existence of group differences in a number of areas (such as nonverbal communication, individual and family values, family and community structures, preferred and accepted responses to crisis, response to exclusion or oppression) and how these may impact intervention relationships with children, youth, and their families.

b. Social change and social justice issues will be addressed in relationship to children and youth as populations who experience vulnerability due to developmental and status factors (i.e., age and dependence), in addition to other impacts they may experience due to membership in other groups which encounter exclusion and discrimination. In recognition of this, abuses of power within the family (i.e., domestic violence, physical and sexual abuse and exploitation) will be addressed as issues related to social justice and human rights, and not just as indicators of individual and family psychopathology. Advocacy for children and youth, especially those whose families and communities are particularly impacted by social inequality and social injustice, will be emphasized at individual, family, organizational, community, and policy levels.

c. Promotion and prevention are particularly important for child and youth populations, due to the increased likelihood of negative outcomes as services or interventions are delayed, and the “time-limited” nature of childhood and youth. These areas are addressed in the direct practice areas through family life education, family preservation activities, screening early identification of children at risk, and family and community based early intervention with children and youth in a variety contexts. At the indirect practice level, program development and evaluation, staff and professional training, fiscal and economic issues and policy analysis addresses the relationship between policy decisions and risks to children and youth.

d. Social science knowledge is presented as the necessary basis for conducting empirically grounded assessment, intervention and evaluation practice at all levels of intervention. Course materials draw upon research knowledge from a variety of social sciences, as well as other professions and disciplines (i.e., social work, medicine, psychology, sociology, economics, law, etc.), and emphasize the need for multidisciplinary collaboration and communication around issues related to children and youth. Social science research concepts and methods are described in relationship to both social work practice and program evaluation processes.

Relationship of this course to Social Work Ethics and Values:
Practice with children and youth requires considerable attention to issues of ethics and values, due to the special challenges these populations offer the social work practitioner. For example, confidentiality cannot be maintained when suspected child abuse or neglect must be reported, and issues of self-determination and autonomy often arise when an adolescent discloses important information that has not been shared with a parent or other responsible adult. Social work values and social science knowledge may also conflict with the child-rearing beliefs and practices of some cultural or religious groups. Resource limitations or lack of training or sensitivity may result in
inappropriate treatment for some children or youth and their families, and others may be excluded entirely. Finally, social policy decisions significantly affect the lives of children and youth, the stability of their families and communities, and their access to resources and services. Although this course emphasizes, in relationship to each of the substantive areas outlined above, the importance of examining the complexities of ethical and value issues as they apply to the problems of children and youth; social work values and ethics, as outlined in the professional Code of Ethics, are presented as the necessary and appropriate guidelines for practice when ethical dilemmas arise in social work practice.

**Course Requirements:**

Two Briefs from Community/ University/ Professional Presentations/ Trainings on Special Issues Facing Children and Youth (Due: Anytime during the Semester) 20%

Practice/ Research Literature Review Paper - Specialized Child/ Youth Population Focus 45%
Due: March 13, 2001

Training Module/ Community Change/ Advocacy-Skills in Action - Small Group Assignment
Due: April 10 and April 17, 2001 30%

In class participation of readings discussion and skill development sessions 5%

**Required Course Readings:**

A course packet of required readings is available for purchase at Ulrich’s Bookstore. One set of the readings is also located on Reserve at the School of Social Work Library.

**Class Schedule:**

Jan. 9 and Jan. 16

**The Context - Children and Youth Social Work Practice**

**The Ecological Perspective**

**Prevention and Intervention Strategies - Framework for Understanding Professional Change Efforts**

**Communication Across Cultures/ Valuing Diversity**

**Social Change and Social Justice Issues in Working with Children/ Youth and Families**

Jan. 23 and Jan. 30
Interagency Collaboration, Cross System Interventions and Systems of Care Framework
Skills in Communicating and Establishing Relationships with Children, Youth and Families
Evaluating the State of Practice - Reviewing the Research

Feb. 6
Early Interventions and Prevention Services for Special Children and Youth Populations
Developmental Disabilities Sector and Children/Youth living in Poverty

Feb. 13 and Feb. 20
The Mental Health and the School Based Sectors- Effective Interventions and Preventive Approaches

Skill Development Exercises at the Micro/Mezzo/Macro Level

Feb. 27 Spring Break

March 6
Continuation of the Mental Health Sector/ School Based Sectors for Prevention and Intervention

March 13 and March 20
The Child Welfare Sector- Prevention and Intervention

Skill Development Exercises - Micro/ Mezzo/ Macro Level

Practice Literature Review Paper Due: March 13

**March 27**

**The Juvenile Justice Sector and Substance Abuse Sector-Prevention and Intervention**

**Special Issues for Gay and Lesbian Youth**

**Skill Development Exercises at the Micro/ Mezzo/ Macro Level**

**April 3**

**Small Group In-Class Preparation**

**Special Issues in Delivery of Services to Children/Youth and Their Families – Ethical Dilemmas**

**April 10 and April 17**

Small Group Presentations - Training Module/ Community Change/ Advocacy

End of Semester Course Evaluation
Two Briefs from Community/ University/ Professional Presentations/ Trainings on Special Issues facing Children and Youth (Due: Anytime during the Semester) 20%

Identify two community/ university/ professional presentations/ trainings that you will attend which focuses on a special issue facing children and youth.

For each presentation or training, summarize the key points in the presentation/ training. Discuss the presentation in context of the four curricular themes in this course (multicultural and diversity issues; social change and social justice issues; promotion and prevention and social science knowledge).

Length: 3 pages per brief.

Practice/ Research Literature Review Paper - Specialized Child/ Youth Population Focus
Due: March 13, 2001 45%

Select a topic that focuses on a particular population of children/ youth.

Conduct an extensive practice/ research literature review of this special population using primarily peer-reviewed journal articles and selected documents or books.

Integrate the findings from your review under the following themes:

1. Understanding the Context and Challenges for the Special Population - (Special emphasis on multicultural, diversity and social justice issues in this section)
2. Current Prevention and Intervention Practices/ Research with this Special Population (Address the strengths and limitations of the practice/ research literature as one examines the diversity within the special population)
3. Policy/ Advocacy Issues - with a special emphasis on social change efforts

This paper will be approximately 12 pages.

Training Module/ Community Change/ Advocacy-Skills in Action - Small Group Assignment
Due: April 10 and April 17, 2001 30%

You will work with three or four other class members on development of a training module for working with a special child/ youth population or a community assets/ neighborhood based change effort or an advocacy initiative for policy change focusing on a sub-population of children/ youth.

You will have 30 minutes to present your work to the class. During the in-class presentation your group needs to establish the context for the effort. If your group selects to develop a training module than your group will present one component of training to the class. If your group selects to examine a community assets/ neighborhood change effort than your group will engage the class in one of the community change efforts (e.g., nominal group process, community forum). If your group selects to engage in an advocacy initiative for policy change your group might decide to engage in testifying before a policy making board in the class presentation.

Each group will submit a summary of the task work of the group, the actual intervention proposed and an outline of the activities that the group would engage in the training/ change initiative. (5 pages)
